Response to climate-related opportunities

Opportunity

BESS is best for Ballarat

Downer and Spotless have combined to help deliver Victoria's first utility-scale Battery Energy Storage System (BESS) in Ballarat.

Downer completed construction of the 30-megawatt (MW) 30 megawatt-hour (MWh) BESS in Ballarat.

Key findings include:

Downer's strategy was found to be resilient and well positioned in all scenarios used due to the diversification of services across multiple sectors, existing market presence and capabilities

A <2°C world provides considerable opportunities which outweigh identified

5 Decarbonisation includes the use of registered certified offsets.

6 This is consistent with a 1.5 degree pathway using the latest International Panel on Climate Change (IPCC) scientific reports.
